Year 3 Maths Activity Mat 3 Spring 2

a

What time will it be in one hour?

_____

b

How many days are there in two weeks?

_____

c

If there are six stacks of five chairs, how many chairs are there altogether?

Write a number statement to show your reasoning.

_____

d

80 tenths ÷ 10 =

60 tenths ÷ 10 =

e

How long is caterpillar A?

_____ 

How long is caterpillar B?

_____ 

f

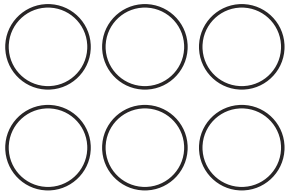

Complete the multiples pattern.

10, 20, 30, _____

15, 20, 25, _____

g

Colour the circles to show the fraction.

$\frac{2}{6}$ 

h

Match up the Roman numerals to the numbers.

X	6
III	10
VI	3

Year 3 Maths Activity Mat 3 Spring 2 **Answers**

a

What time will it be in one hour?

4 o'clock

4.00

b

How many days are there in two weeks?

14 days

c

If there are six stacks of five chairs, how many chairs are there altogether?

Write a number statement to show your reasoning.

6 × 5 = 30

d

80 tenths ÷ 10 = **8 tenths**

60 tenths ÷ 10 = **6 tenths**

e

How long is caterpillar A?

5cm

How long is caterpillar B?

3cm

f

Complete the multiples pattern.

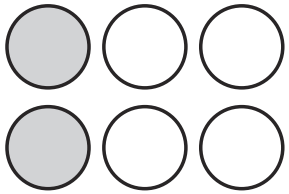

40, 50, 60, **70, 80, 90**

30, 35, 40, **45, 50, 55**

g

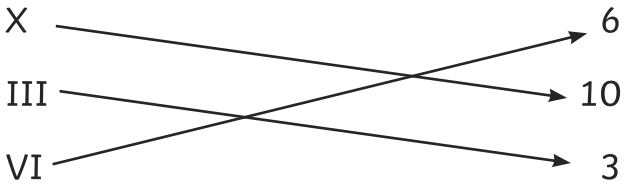

Colour the circles to show the fraction.

$\frac{2}{6}$

h

Match up the Roman numerals to the numbers.

Year 3 Maths Activity Mat 3 Spring 2

a

What time will it be in half an hour?

_____

b

If there are four weeks in a month, how many weeks are there in three months?

_____

c

If there are four stacks of four plastic cups, how many cups are there altogether?

Write a number statement to show your reasoning.

_____

d

7km ÷ 10 = km

5kg ÷ 10 = kg

e

Draw a caterpillar that is 5.5cm long.

f

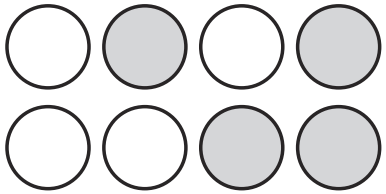

Complete the multiples pattern.

12, 16, 20, _____

8, 16, 24, _____

g

What fraction is this diagram showing?

_____

h

Write the correct numbers beside the Roman numerals.

XI

V

IX

II

Year 3 Maths Activity Mat 3 Spring 2 **Answers**

a

What time will it be in half an hour?

5 o'clock

5.00

b

If there are four weeks in a month, how many weeks are there in three months?

12 weeks

c

If there are four stacks of four plastic cups, how many cups are there altogether?

Write a number statement to show your reasoning.

4 × 4 = 16

d

7km ÷ 10 = **0.7km**

5kg ÷ 10 = **0.5kg**

e

Draw a caterpillar that is 5.5cm long.

A correctly drawn caterpillar measuring 5.5cm long.

f

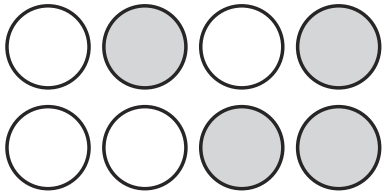

Complete the multiples pattern.

12, 16, 20, **24**, **28, 32**

8, 16, 24, **32, 40, 48**

g

What fraction is this diagram showing?

$\frac{1}{2}$

h

Write the correct numbers beside the Roman numerals.

XI **11**

V **5**

IX **9**

II **2**

Year 3 Maths Activity Mat 3 Spring 2

a

What time will it be in one hour and 10 minutes?

b

If there are four weeks in a month, how many weeks are there in eight months?

c

If there are nine fish tanks with four fish in each, how many fish are there altogether?

Write a number statement to show your reasoning.

d

86km ÷ 10 = km

34m ÷ 10 = m

e

Draw a caterpillar that is 6.8cm long.

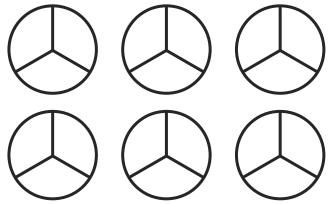

f

Write five numbers which are multiples of eight.

g

Show the fraction by colouring the correct amount.

$\frac{5}{9}$

h

Write the Roman numerals for these numbers:

10

15

20

7

Year 3 Maths Activity Mat 3 Spring 2 **Answers**

a

What time will it be in one hour and 10 minutes?

3.40

twenty minutes to four

b

If there are four weeks in a month, how many weeks are there in eight months?

32 weeks

c

If there are nine fish tanks with four fish in each, how many fish are there altogether?

Write a number statement to show your reasoning.

9 × 4 = 36

d

86km ÷ 10 = **8.6km**

34m ÷ 10 = **3.4m**

e

Draw a caterpillar that is 6.8cm long.

A correctly drawn caterpillar measuring 6.8cm long.

f

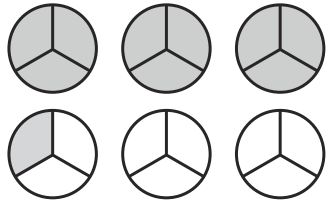

Write five numbers which are multiples of eight.

Any five multiples of eight.

g

Show the fraction by colouring the correct amount.

$\frac{5}{9}$

h

Write the Roman numerals for these numbers:

10 **X**

15 **XV**

20 **XX**

7 **VII**
