Year 3 Maths Activity Mat 2 Spring 2

a

Write the next three measures in the sequence:

5m, 15m, 25m _____

_____

b

Put a circle around the largest fraction in the pair:

$\frac{1}{3}$ $\frac{1}{4}$

$\frac{1}{5}$ $\frac{1}{10}$

c

Work these out in your head.

36cm + 7cm =

25cm + 50cm =

d

A sack of potatoes weighs 25kg. 7kg of potatoes are eaten. How many kilograms are left?

_____

e

×	40	5	g
6			g

f

Measure the sides of the rectangle, and the work out the perimeter.

_____

g

Find:

$\frac{1}{4}$ of 20 _____

h

How much is ten 5 pence coins?

_____

Year 3 Maths Activity Mat 2 Spring 2

a

Write the next three measures in the sequence:

35m, 45m, 55m

b

Put a circle around the largest fraction in the pair:

$\frac{1}{3}$ $\frac{1}{4}$

$\frac{1}{5}$ $\frac{1}{10}$

c

Work these out in your head.

36cm + 7cm = **43cm**

25cm + 50cm = **75cm**

d

A sack of potatoes weighs 25kg. 7kg of potatoes are eaten. How many kilograms are left?

18kg

e

×	40	5	g
6	**240**	**30**	g

240+30=270g

f

Measure the sides of the rectangle, and the work out the perimeter.

14cm

g

Find:

$\frac{1}{4}$ of 20 = **5**

h

How much is ten 5 pence coins?

50p

Year 3 Maths Activity Mat 2 Spring 2

a

Write the next five measures in the sequence:

280ml, 380ml, 480ml, _____

_____

b

Put a circle around the largest fraction in the pair:

$\frac{11}{12}$ $\frac{7}{12}$

$\frac{7}{12}$ $\frac{7}{10}$

c

Work these out in your head.

754m + 60m =

£851 - £8 =

d

A large packet of Wheaty Flakes holds 800g. A small packet holds 500g. How many more grams does the large packet hold than the small packet?

_____

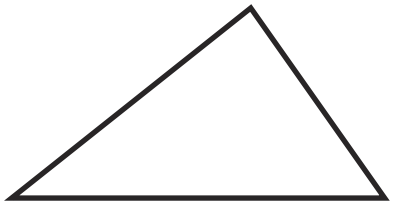

e

×	80	4	g
7			g

f

Measure the perimeter of the triangle.

_____

g

Find:

$\frac{1}{8}$ of £16 _____

h

How much is forty £5 notes?

_____

Year 3 Maths Activity Mat 2 Spring 2

a

Write the next five measures in the sequence:

580ml, 680ml, 780ml, 880ml, 980ml

b

Put a circle around the largest fraction in the pair:

$\frac{11}{12}$ $\frac{7}{12}$

$\frac{7}{12}$ $\frac{7}{10}$

c

Work these out in your head.

754m + 60m = **814m**

£851 - £8 = **£843**

d

A large packet of Wheaty Flakes holds 800g. A small packet holds 500g. How many more grams does the large packet hold than the small packet?

300g

e

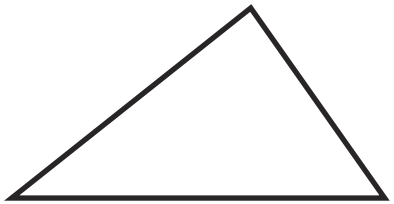

×	80	4	g
7	560	28	g

560+28=588g

f

Measure the perimeter of the triangle.

12cm

g

Find:

$\frac{1}{8}$ of £16 **£2**

h

How much is forty £5 notes?
£200

Year 3 Maths Activity Mat 2 Spring 2

a

Write the next five measures in the sequence:

2423m, 2424m, 2425m, _____

_____

b

Put a circle around the largest fraction in the pair:

$\frac{3}{8}$ $\frac{1}{4}$

$\frac{9}{12}$ $\frac{5}{6}$

$\frac{2}{6}$ $\frac{3}{12}$

c

Work these out in your head.

☐ + 30g = 604g

☐ + 8 litres = 323 litres

☐ – 200g = 106g

d

One litre of lemonade is poured into four glasses. How many millilitres of lemonade is in each glass?

_____

e

×	60	3	g
9			g

The answer in kg and g is _____

f

Draw a rectangle with a perimeter of 12cm.

g

Find:

$\frac{1}{4}$ of £5 _____

$\frac{3}{4}$ of 200g _____

h

3 × 900 = _____

Year 3 Maths Activity Mat 2 Spring 2 **Answers**

a

Write the next five measures in the sequence:

2426m, 2427m, 2428m, 2429m, 2430m

b

Put a circle around the largest fraction in the pair:

$\frac{3}{8}$ $\frac{1}{4}$

$\frac{9}{12}$ $\frac{5}{6}$

$\frac{2}{6}$ $\frac{3}{12}$

c

Work these out in your head.

574g + 30g = 604g

315 litres + 8 litres = 323 litres

306g – 200g = 106g

d

One litre of lemonade is poured into four glasses. How many millilitres of lemonade is in each glass?

250ml

e

×	60	3	g
9	**540**	**27**	g

540+27=567g and 0.567kg

f

Draw a rectangle with a perimeter of 12cm.

A correctly drawn rectangle with a perimeter of 12cm.

g

Find:

$\frac{1}{4}$ of £5 = **£1.25**

$\frac{3}{4}$ of 200g = **150g**

h

3 × 900 = **2700**
